## **DETAILED ACTION**

### ***Response to Amendments***

1. The reply filed 6/8/04 consists changes in Figure 1 & title, amendments to independent claims 1, 8 and 15 and remarks related to rejection of claims. The claim are not allowable as explained below.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The use of different protocol through the cable and the connector has not been described in the specification.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Bucklen (2003/0159725).

Bucklen (Figures 1-3) shows an apparatus and method for constructing a communication cable 20 with electrical conductors and optical fibers with integrated electrical connectors at each end which are used for plug-in connections to matching electrical connectors on target devices for transmitting digital and/or analog data wherein the matching electrical connector may be compatible to a proprietary system interconnection and the data transmission is compatible with optical fiber channel protocol. The data transmission protocol through the cable is through transmission of optical signals wherein the data transmission between the connectors include electrical signal which uses a protocol different than that of optical signal transmission through the cable.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2839

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Response to Arguments***

7. Applicant's arguments filed 6/8/04 have been fully considered but they are not persuasive. See Item 5 above.
